AN EXELON COMPANY

Dear Customer:

At PECO, we are committed to providing safe and reliable energy for our customers and the communities we serve. As part of our work, we will be upgrading and installing new equipment to enhance the local electric infrastructure in Yardley Borough and Lower Makefield Twp.

This project is part of our overall system investment of \$6 billion during the next five years to inspect equipment, complete targeted system enhancements and corrective maintenance, invest in new equipment, and perform tree work. This also includes PECO's Reliability & Resiliency Plan, which will help to prevent customer outages, modernize the electric grid, reduce the impact of extreme weather on electric infrastructure, and support the adoption of clean energy resources.

About the Project:

- Work will begin in December 2024.
- We will be spending over \$9 million upgrading and installing new, innovative equipment, including new poles and tree-resistant aerial wires to provide you with safe and reliable service and meet the evolving needs of our customers
- In addition, advanced devices will be installed that can stop the flow of electricity on the line if a problem occurs and automatically restore electricity where possible.
- As part of this work, we will begin an enhanced tree work program across the region to reduce the number of outages caused by trees and other vegetation
- Work in Yardley Borough will occur along West Afton Ave, East Afton Ave, East College Ave, West College Ave, South Main St, South Delaware Ave, Reading Ave, South Canal St, Ferry St, Bell Ave, Longshore Ave, South Bell Ave, Carrs Ln, Pennsylvania Ave, Letchworth Ave, South St, Vanhorn Ave and Harper Ave.
- Work in Lower Makefield Twp will occur along Afton Ave, Temple Dr, Dickinson Dr, Sandy Run Rd, Drexel Dr, Lehigh Dr, College Ave, Reading Ave, Fairway Dr, Edgewood Rd, Oxford Valley Rd, Mahlon Dr, River Rd, Moyer Rd, Gainsway Rd, Sensor Rd, Lanyard Rd, Jade Rd, Briarwood Ct, Green Ridge Rd, Lakeshore Dr, Kings Rd, Dukes Dr, Countess Dr, Queens Dr, Baron Dr, Princess Dr and Duchess Dr.
- All work will be performed by PECO crews and qualified PECO contractors

Tree Work:

- PECO will invest an additional \$320 million on tree work across approximately 600 miles of aerial electric lines during the next 10 years.
- This will include tree trimming, tree removals and may involve your backyard.
- We will notify customers if any tree work must occur on their property and will work directly with those customers to develop a plan.
- PECO works with certified arborists and professional foresters and adheres to national ANSI A300 standards when managing tree trimming and removal.

Timeline:

- Tree work is scheduled to begin in December 2024 and work on electrical equipment, including poles and wires, is scheduled to start once tree trimming work is complete.
- The project is expected to be completed in late December 2026.

Crews may need to temporarily interrupt electric service to safely complete some of this work. We will work with customers to ensure they are informed in advance of our activities and any planned interruptions. To ensure you receive all outage updates, please confirm that your phone number is accurate in our system through MyAccount at peco.com/myaccount or by calling PECO at 1-800-494-4000.

We will also work closely with local officials to minimize the impact on traffic and pedestrians whenever possible. Access for services such as trash removal, student transportation and emergency vehicles will be maintained during construction.

If you have any questions regarding the details of this project and how it may impact you, please contact Gary Dollahon, Customer Service Liaison, at Gary.Dollahon@exeloncorp.com.

Sincerely,

Chantee Angus,
Director, Regional Electrical Operations, PECO
