

Southeast Region SDW Certified Laboratory List - Residential

This is a condensed list intended for citizens seeking residential water testing. A list showing all chemicals each regulated lab is certified to test is available upon request.

Drinking Water Test Key

[EPA's home well testing recommendations](#)

Contaminant	Why You Might Test	Primary Source in Well Water
Total coliform & E. coli	Microbial contamination can cause illness. EPA recommends annual testing.	Runoff, septic systems, animals, poor well construction
Nitrate/Nitrite	Infant or nursing mother at property, proximity to agriculture. EPA recommends annual testing.	Agriculture, septic systems
Lead and Copper	Lead and copper piping or fixtures	Piping and water fixtures corroded by water
Alkalinity and pH	Optimizing water treatment to reduce lead and copper	Geologic formations, water treatment
Hardness	Grey film/scale on sinks and appliances, reduced lather from soaps	Geologic formations
Iron	Brown or red water stains, metallic taste	Geologic formations
Manganese	Black staining or water, metallic taste	Geologic formations
Sodium	Salty tasting water, proximity to heavily salted roadway	Geologic formations, roadway applications
Other trace metals	Metallic-tasting water, proximity to mining, suspected contamination	Geologic formation, mining
Volatile Organic Chemicals	Well proximity to oil storage tank, landfill, gas station, etc.	Industrial and fuel tank contamination
Synthetic Organic Contaminants	Well proximity to heavy industry or farm with pesticide/herbicide use	Herbicides, pesticides, industrial run-off
Radiological Contaminants	Radon in indoor air or region is radon rich	Geologic formations
PFAS	Well proximity to superfund sites or military bases	Industrial and fire fighting foam contamination

Statewide; Penn State Extension
